1. The first part of the paper discusses the importance of the study of the history of the United States. It is argued that a knowledge of the past is essential for a full understanding of the present and for the development of a sound policy for the future.

2. The second part of the paper is devoted to a study of the early years of the United States. It is shown that the early years were a period of great struggle and uncertainty, and that the country was not unified until the end of the eighteenth century.

3. The third part of the paper is devoted to a study of the middle years of the United States. It is shown that the middle years were a period of rapid growth and development, and that the country became a world power.

4. The fourth part of the paper is devoted to a study of the late years of the United States. It is shown that the late years were a period of great change and uncertainty, and that the country was not unified until the end of the nineteenth century.

5. The fifth part of the paper is devoted to a study of the present years of the United States. It is shown that the present years are a period of great change and uncertainty, and that the country is not unified until the end of the twentieth century.

6. The sixth part of the paper is devoted to a study of the future of the United States. It is shown that the future of the United States is uncertain, and that the country is not unified until the end of the twenty-first century.

7. The seventh part of the paper is devoted to a study of the importance of the study of the history of the United States. It is argued that a knowledge of the past is essential for a full understanding of the present and for the development of a sound policy for the future.

8. The eighth part of the paper is devoted to a study of the early years of the United States. It is shown that the early years were a period of great struggle and uncertainty, and that the country was not unified until the end of the eighteenth century.

9. The ninth part of the paper is devoted to a study of the middle years of the United States. It is shown that the middle years were a period of rapid growth and development, and that the country became a world power.

10. The tenth part of the paper is devoted to a study of the late years of the United States. It is shown that the late years were a period of great change and uncertainty, and that the country was not unified until the end of the nineteenth century.
